

Multi-Document Batch A

Synthetic medical document packet for duplicate-detection testing.

Document count: 4

Contains separate synthetic patient documents, multi-page sections, duplicate-adjacent pages, and unique content.

No real patient data. Not for clinical use.

Boundary markers in this packet are intentionally simple so downstream tools can test page grouping.

REASON FOR CONSULT

Synthetic review of recurring cough symptoms and mock medication reconciliation within a multi-document batch.

PERTINENT HISTORY

The patient in this fictional packet has a prior synthetic ED visit and a mock laboratory panel. This page is part of a generated batch, not a real medical record.

FINDINGS

No distress. Mock chest exam clear except a single placeholder wheeze statement. The exact language may repeat elsewhere in this dataset for testing.

RECOMMENDATION

Coordinate with Demo Primary Care Clinic. Schedule fictional follow-up after document-processing validation is complete.

REASON FOR CONSULT

Synthetic review of recurring cough symptoms and mock medication reconciliation within a multi-document batch.

PERTINENT HISTORY

The patient in this fictional packet has a prior synthetic ED visit and a mock laboratory panel. This page is part of a generated batch, not a real medical record.

FINDINGS

No distress. Mock chest exam clear except a single placeholder wheeze statement. The exact language may repeat elsewhere in this dataset for testing.

RECOMMENDATION

Coordinate with Demo Primary Care Clinic. Schedule fictional follow-up after document-processing validation is complete.

Medication	Dose	Frequency	Comment
Lisinopril	10 mg	Daily	Mock chronic medication
Metformin	500 mg	Twice daily	Synthetic medication history
Albuterol	90 mcg	As needed	Training-inhaler example
Acetaminophen	500 mg	Every 6 hours PRN	Example OTC entry

MEDICATION RECONCILIATION NOTE

This synthetic medication list intentionally overlaps with sections from other pages but is not an exact duplicate of any full page.

Outside Lab Attachment - Synthetic

ATTACHMENT

Patient: Synthetic Patient N MRN: SYN-0016 Encounter: 2026-04-29 Doc: BAT-A-LAB

ATTACHMENT

Synthetic outside laboratory attachment embedded as an image page inside the batch.

VALUES

WBC 6.9, Hgb 13.1, Platelets 244, Sodium 140, Potassium 4.0. All values are fictional.

ROUTING

Route to Demo Primary Care Clinic after batch parsing test.

Urgent Care Triage Addendum

Patient: Synthetic Patient C | MRN: SYN-0003 | Encounter: 2026-04-18 | Document: UC-C-014

VISIT REASON

Synthetic triage addendum for ankle discomfort after a treadmill exercise session. This page is intentionally unique and should not match the exact-duplicate pair.

VITALS

Temperature 36.7 C; heart rate 72 bpm; blood pressure 118/72 mmHg; respiratory rate 14/min; oxygen saturation 99 percent on room air.

EXAM SUMMARY

Mild lateral ankle swelling in mock text. Pulses present. No open wound. Gait mildly antalgic in this synthetic example.

DISPOSITION

Mock discharge to home with fictional printed education packet code EDU-SYN-ANKLE-02.
